Thanks, Chris. I share your level of GIS expertise.

I forwarded your message to Bristol. I think this should be perfect for what they need. No need for you to expend additional time.

Many thanks.

Bob

Hi Bob:

Unfortunately I'm more or less a GIS neophyte. This link might explain the system a little better: <http://dnr.wi.gov/maps/gis/wtm8391.html> .

Our RR Sites Map program also has a tab for geolocation information and conversion (see upper right corner below):

RR Sites Map

Welcome to RR Sites Map

RR Sites Map provides information about contaminated properties and other activities related to the investigation and cleanup of contaminated soil or groundwater in Wisconsin.

Tips and Navigation

Toolbar

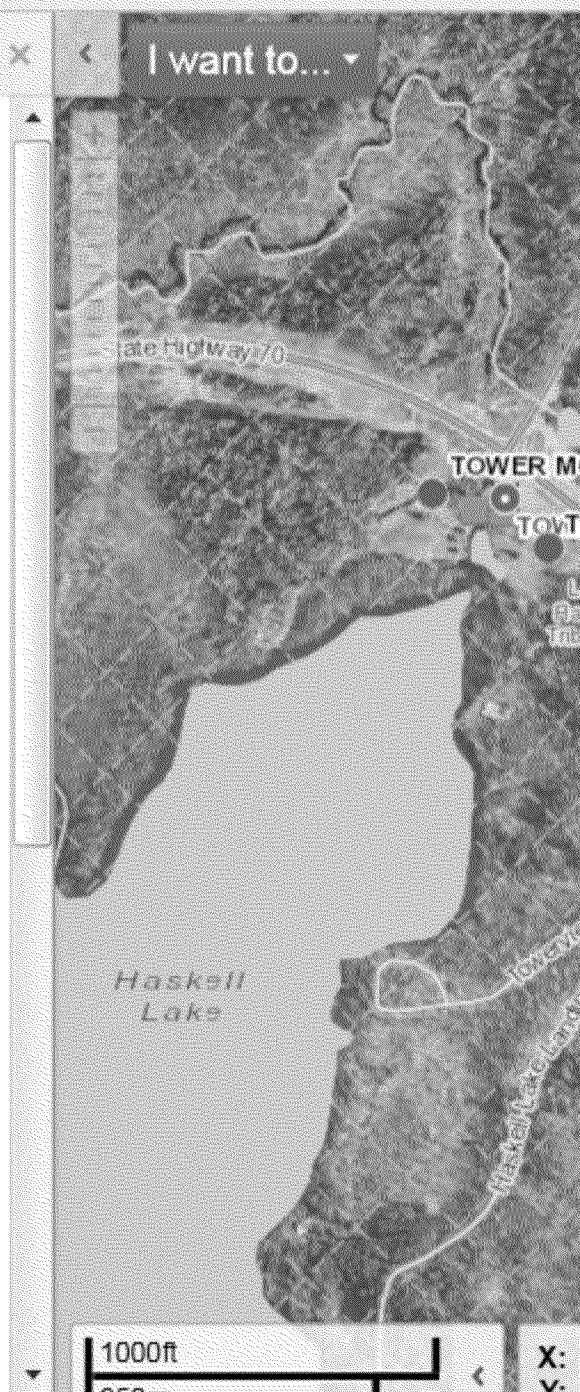

- For information about a site, click the **Point Identify** button, followed by clicking on a site
- For layer definitions click the **Layer Information** button
- **Identify Tools:** the **Freehand** and **Line Identify** buttons return feature results that intersect the line you draw.
- Tip: Trouble ending a line or polygon when drawing, identifying or measuring? Try double clicking

Map Layers Panel

- To view map layers click the **Map Layers** tab below
- To view each layer's contents click the plus sign
- To make data in the map visible check the box next to the layer, then click on the layer and select **"Zoom to Visible Scale"**
- To turn labels on and off click on layer and check/uncheck label box (note: visible scale 1:39,600)

Find Locations

- To locate a specific site explore the tools in the **Find Location** tab or enter text into the **Search Box**

Dave Larsen indicated that the format under which he originally submitted the locational data (PENZD) was in the Wisconsin County Coordinate System. According to Larsen, "Land Surveyors typically use the Wisconsin County Coordinate System as many of their maps and measurements can then be incorporated into that specific County's GIS mapping database." So perhaps his original (03/01/16) email submittal would work better for your contractors?

I hope this helps. If not, let me know and I'll check around for a better explanation.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Hi Chris,

Thanks for sending this. Unfortunately, my contractor is having trouble with the location data. Is there a WDNR reference for how to submit the data and how it might be related to other coordinate projections?

Thank you.

Hi Bob:

I found this in my Inbox when I got back to the office today after being out at some training on Wednesday and Thursday. Let me know if this will work for you in terms of locations.

As for the field notebooks, I'm going to talk to Dave Larsen again about that issue. So far, he has been reluctant to share those notes. I think this should be one of the issues that we cover at the (eventual) communications/technical meeting(s).

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Chris,

I don't want to continue to bother you about this, but we still need the location information for the wells and borings, and if they exist (if not, that is good information also), copies of the field note book pages from the REI 9/2015 field effort.

Thank you.
